— EXPERIENCE

2024 — Present

Sr. Enterprise Architect

Virginia Department of Transportation

Lead statewide enterprise architecture strategy governing mission-critical transportation platforms, aligning IT investments with agency-wide business and operational priorities.

- Established architecture governance, standards, and performance metrics to strengthen compliance, accountability, and cross-division alignment.
- Directed product line roadmaps and budget forecasting to ensure modernization initiatives aligned with fiscal constraints and long-term strategy.
- Authored enterprise architecture research influencing statewide digital strategy, resulting in approved innovation initiatives.
- Championed secure adoption of cloud-based solutions, implementing governance frameworks and regulatory controls to enhance data protection and compliance.

2016 — 2023

Sr. Manager, Software Engineering Architect

Capital One

Architected and led mission-critical enterprise payment systems and cloud migration strategies for a Fortune 100 financial institution, supporting platforms serving nearly 60 million monthly users and processing approximately \$2 trillion annually.

- Directed multi-disciplinary architecture teams across engineering, product, and security, owning end-to-end platform architecture and delivery outcomes.
- Drove a \$30M annual revenue increase through strategic re-architecture of payment platforms, improving throughput and scalability.
- Reduced feature delivery timelines by 75% by transitioning legacy systems to microservice-based architectures.
- Partnered with executives and product leaders to define cloud-first architectural roadmaps and business capability maturity models.
- Held accountability for architectural decisions impacting platform risk, regulatory compliance, and long-term sustainability.

2019 – 2021

Manager, Software Engineering

Capital One

Managed a team of high-performing full-stack engineers to deliver automated solutions and back-office applications, streamlining divisional application and infrastructure deployment.

- Led engineering teams in the delivery of automated solutions to support business needs.
- Streamlined application and infrastructure deployment processes.
- Mentored and developed engineering talent within the organization.

2018 – 2019

Senior Software Engineer

Capital One

Architected solutions driving automation around management and deployment of Cloud Infrastructure in a compliant and secure manner.

- Developed an automated pipeline for rolling back production changes within an established and unchangeable pipeline controlled by another group.
- Drove automation for secure and compliant cloud infrastructure deployment.

2016 – 2018

Senior Cloud Platform Engineer

Capital One

Orchestrated and enhanced the software and systems underpinning Capital One's public cloud platforms, emphasizing a holistic understanding of interrelated system frameworks.

- Strategic Cloud Management: Orchestrated and enhanced the software and systems underpinning Capital One's public cloud platforms.
- Emphasized a holistic understanding of interrelated system frameworks to improve platform stability.

2010 – 2016

Enterprise Solutions Architect

Bank of America

Led enterprise architecture initiatives supporting large-scale financial systems across multiple business units, delivering secure, high-availability platforms aligned with corporate strategy.

- Guided teams through major infrastructure modernization and data center migration initiatives.
- Directed business capability mapping to identify long-term transformation opportunities.
- Served as a trusted architecture advisor contributing to enterprise-wide technology decisions.

2008 – 2010

Enterprise Architecture Consultant

Bank of America

Designed and implemented technology solutions that aligned with business objectives, resulting in significant infrastructure cost reductions and increased system uptime.

- Enhanced customer experience and operational efficiency through strategic technology solutions.
- Successfully completed numerous data center migration projects.
- Achieved significant infrastructure cost reductions and increased system uptime.

2007 – 2008

IT Program Manager

US Navy

Integrated RFID technology to enhance manufacturing process efficiency and established disaster recovery plans at the Naval Ophthalmic Support & Training Activity (NOSTRA).

- Integrated RFID technology to enhance manufacturing process efficiency.
- Established a disaster recovery plan and implemented strategic technology solutions.
- Improved overall IT infrastructure and operational efficiency.

2002 – 2007

Senior Enterprise Architect

US Army

Re-architected middleware to reduce unplanned system outages and improve operational efficiencies at Fort Lee (Gregg-Adams).

- Re-architected middleware to reduce unplanned system outages.

- Improved operational efficiencies through architectural modernization.

1997 – 2001

Petty Officer 3rd Class

US Navy

Served as Petty Officer 3rd Class in the US Navy.

- Honorable service in the United States Navy.

– EDUCATION

B.S. Information Systems

Strayer University
